### **DETAILED ACTION**

1. Applicant's arguments filed on 3 November 2004 with respect to claims 1-30 are persuasive. Therefore, the rejection of claims 1-30 under 35 U.S.C. 103(a) is being now withdrawn.

Claims 31-34 are added.

Claims 1-34 remain pending for examination.

### **REASONS FOR ALLOWANCE**

2. Claims 1-34 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1, 7 and 14, the claimed features "a memory board for a data storage system, comprising memory which is configured to store a doubly linked list data structure; and automatically modify the doubly linked list data structure in accordance with the modify command and provide a result to the processor of the data storage system through the interface in response to modifying the doubly linked list data structure" in combination with other element of the independent claims would not found anticipated or obvious over the prior art made of record. With respect to claim 21, the claimed features "a memory board control circuit for accessing a doubly linked list data storage system of a data storage system, the memory board control circuit being mountable to a memory board, the memory board control circuit comprising automatically modify the doubly linked list data structure in accordance with the modify command and provide a result to the processor of the data storage system through the

interface in response to modifying the doubly linked list data structure” in combination with other element of the independent claims would not found anticipated or obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

The closest prior art, U.S. Patent No. 5,884,098 issued to Mason, Jr., relates to the caching of data. U.S. Patent No. 6,581,063 issued to Kirkman, relates to software data structures commonly known as linked lists but fail to teach the above limitations. EP 0114190 issued to Hartung relates to data handling hierarchical.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
